Dissidia final fantasy opera omnia characters ranking

The Final Fantasy: Opera Omnia (DFZEE) is a free-to-play mobile RPG that combines all The Final Fantasy universes together, allowing players to assemble a dream team of their favorite characters to fight the most infamous villains. Launched in Japan in 2017 and globally in 2018, the strategic turn-based action game still sees a lot of play today. Given the wide range of characters to add potential to your party, you might be wondering to go about selecting or classifying them. Look no further, because we've compiled a number of classification systems right here. After you can see, the strongest DFTOO characters right now are: Vaan, Squall, Laguna, Cloud, Terra, Yuna, Serah. The first table is the list of levels based on Alera players from Japan. The Japanese version of the game received access to updates before the overall, which gave them plenty of time to figure things out. For this list, see this spreadsheet. One thing to keep in mind with all these Final Fantasy Dissidia: Opera Omnia tier lists is that they are not necessarily drawing plans. Alera scores are also an imperfect way to measure character rankings, but it is one of the few quantitative ways to do so. So take these level lists with a bob bob Salt. Ultimately what matters most is your personal pleasure. If you like a certain character by all means go for it!
